

ADVANTAGES

- Optional particulate filter section, fan motor, and exhaust stack
- Safe and easy routine maintenance access
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Contact time range of 1 second
- Wide range of air flows from 8,000 - 62,000 CFM (14,000 to 105,000 m³/h)
- Highly reliable performance

Application	For those applications where plant reliability and elimination of odors and toxic gases from industrial EXHAUST air streams is essential for operational security and regulatory compliance.
Frame	Stainless steel;Steel, painted
Media	Activated Carbon;Impregnated Activated Carbon;Impregnated Activated Alumina
Max Temperature (°C)	90
Min Temperature (°C)	-21
Installation Options	Ducted units typically installed on a concrete pad or roof assembly. See manual for instructions. Power is required if supplied with a fan and/or control panel.
